Introduction to Aircraft Design

Score
88%

Completed On
2026-07-15

This free online aerospace engineering course shows you how manufacturers go about designing an aircraft by developing suitable layouts and configurations that match the market's requirements. We consider how major factors like military operations, technological advancements and airworthiness regulations determine aircraft design specifications. The course takes you through the processes and stages involved in aircraft manufacture. W

Health and Safety - Personal Protective Equipment

Score
88%

Completed On
2026-07-13

Every business needs to develop a safe and healthy working environment. How do you protect the health and safety of your employees? This course provides the latest information on personal protective equipment (PPE), defines their categories and outlines the training requirements needed for any scenario. The first module explores the general use of PPE as a whole while the second module looks at the particular PPE used to protect each body part.
